
CURRICULUM VITAE

Yuanqin Yin, Associate Professor
China Medical University (CMU)
E-mail: yinyuanqin@yahoo.com.cn

Research Objectives

- To discover the key mechanism of carcinogenesis and find the method of tumor therapy.
- To study the mechanism of hepatocellular carcinoma (HCC) in invasion and metastasis.
- To find the therapy methods of HCC.

Qualification

- Worked for molecular oncology in lab for 8 years
- Having research experience in cellular and molecular neuroscience and oncology
- Familiar with various Laboratory works. Perfect in cell culture, PCR, gene cloning, gene expression, in situ hybridization, electrophoresis, Western blots, Northern blots , immunohistochemistry and animal model.

Education

- **09/1998-07/2001** PhD, Dept. of molecular oncology, China Medical University
- **09/1990-07/1993** M.A., Dept. of Infectious Disease, China Medical University
- **09/1985-07/1990** B.A., Dept. of Medical Science, Lanzhou Medical College

Work Experience

- **09/2001-Present:**

Employer: Youhong Jiang, Chairman Prof., Cancer Institute, the First Affiliated Hospital of China Medical University, Shenyang.

Title of position: Associate professor

Responsibility: Doing research in neuroscience and oncology. Teaching molecular oncology for postgraduate student.

- **10/1996-08/1998:** Doctor in chief, the 2nd Clinical Hospital of CMU
- **08/1993-09/1996:** Internship, the 2nd Clinical Hospital of CMU

Skills

- Many years' experience in tumor cell culture.
- Master of flow cytometry techniques and gel electrophoresis technology.

-
- Deep understanding of physiology, pathophysiology and cell biology related basic theory of knowledge and technology.
 - Master of Western blot, in situ hybridization and immunocytochemistry techniques.
 - SiRNA interference techniques. Cell transfection techniques.
